HEROES
FOR YOUNG HEARTS

Living4Burke Screenings
a Lifesaver for Young Athletes
Gerald Foret MD: Family Man, Family Practice
For 36 years, Gerald Foret MD practiced family medicine and geriatrics in Franklin, where he and his wife, Gayle, raised two sons.
Eleven years into retirement, Dr. Foret’s legacy as a Northshore physician continues personally and professionally. The Family Medical Clinic in Franklin, which he founded in 1968, is now part of the St. Tammany Physicians Network, and one of his sons — both are physicians — practices there.
Dr. Foret runs into former patients nearly every day. “I enjoyed my relationships with my patients, and I still do,” he said.
Supporting the foundation is important to the Forets, both avid fans of Louisiana State University football who also closely follow their granddaughter’s basketball team.
“We’ve been fortunate, and I feel we need to give something back,” Dr. Foret said.
Their preferred way to give to the foundation is in the form of appreciated securities. “You get a (tax) deduction for the current value, and you don’t pay capital gains,” Dr. Foret said. “From a tax perspective, it’s a good way to go.”

Trudy Williamson: A Life in Art
At 87, Trudy Williamson still works to promote the arts on the Northshore. She fulfills that commitment by mentoring young artists in her Covington home studio and supporting the arts at St. Tammany Parish Hospital.
Williamson’s support includes donating two paintings to the St. Tammany Hospital Foundation’s Healing Arts Initiative, which works to enhance patient recovery and well-being through art and music. She also has been a consistent donor to St. Tammany Hospital since 2004. In 2008, she dedicated the Hospice Tree for Life to the memory of her husband, E.L. “Chick” Williamson.
Best known for her oil paintings of flowers and landscapes and contemporary abstracts, Williamson is interested in a range of artistic media, including printmaking techniques that draw on ancient Egyptian traditions and encaustics. She has been a driving force with the St. Tammany Art Association since its inception more than 50 years ago.
“People who have had surgery or who are fighting an illness can find calm and peace in art,” said Williamson, who moved to St. Tammany Parish in the 1960s and raised four children here with her husband, E.L. “Chick” Williamson.

Lee Alexius: A Legacy of Service
Lee Alexius’ ties to St. Tammany Parish Hospital run deep. Each of the longtime Covington City Councilman’s four children was born there, as were two of his grandchildren.
But service to the hospital and support for the St. Tammany Hospital Foundation are also family traditions: Alexius’ father was comptroller and later hospital administrator during STPH’s formative years.
“We have strong feelings about Daddy’s legacy and what we did for the hospital, so that’s our biggest connection to it,” said Alexius, a 1963 graduate of St. Paul’s School with a bachelor’s degree in mechanical engineering from Louisiana State University.
Alexius worked as a St. Tammany Junior High School teacher and coached basketball, softball, track and volleyball in Bush prior to a three-decade career with Bolivar. “I feel like much of the hospital’s reputation for excellent care and the close relationship between the community and the hospital’s staff was formed while dad was there,” Alexius added. “It is something that continues today.”
His own legacy of community service continues. Alexius, who has been on the Covington City Council for 20 years, will begin a new term in office this summer.

Hank Miltenberger: Man on the Move
Hank Miltenberger has a unique perspective on St. Tammany Parish Hospital’s role in the community. In 2009, he spent more than two weeks in the hospital after a cycling accident left him with multiple fractures and collapsed lungs.
“The doctors and nurses made me want to get better after an accident that should have killed me,” said Miltenberger, CEO of insurance-services firm Gibilar Inc. and a longtime St. Tammany Hospital Foundation supporter pre-dating his hospital stay.
Miltenberger did get better — fast. An avid competitor, the lifelong Covington resident ran a marathon less than a year later.
He sees the hospital’s role as bigger than personal experience. Its ability to attract top-notch clinicians means local residents can remain close to home during treatment, he said.
Philanthropy is key to having a hospital like this in our community,” Miltenberger said. “We have a hospital that responds to community needs and that is a matter of quality of life, so I encourage people to help it serve all of us.”
When St. Tammany Parish Hospital announced a strategic long-term regional partnership with Ochsner Health System, comprehensive neuroscience care, such as stroke care and neurosurgery, was among the top three areas for initial growth.

The treatment of a recent STPH stroke patient underscores how the institutions are using technology and clinical collaboration to enhance their already excellent stroke programs.

The patient was resting after a successful outpatient procedure when her nurse detected a subtle change in her speech that seemed like something more than drowsiness related to surgical sedation.

That symptom culminated in a first-of-its-kind use of telemedicine equipment that allowed STPH and Ochsner clinicians to successfully collaborate on the patient’s treatment.

Michael Isabelle MD of STPH’s Emergency Department and a team of emergency nurses used mobile telemedicine equipment that gives them around-the-clock, remote access to Ochsner’s stroke specialists.

Speed is critical in treating stroke patients, who lose thousands of irreplaceable brain cells a minute. Clot-busting medicine is highly effective in treating strokes caused by clots that block the flow of blood to the brain, but Tissue Plasminogen Activator, or tPA, can cause additional brain injury under certain circumstances.

The STPH team faced additional complexities in this patient’s care. She had been in surgery less than an hour earlier, meaning potential additional risk to the use of tPA, and the team had never treated a stroke patient in the hospital’s surgery recovery area.

Dr. Isabelle did not want to lose time by moving the patient to the Emergency Department.

“Treat me there where I usually do it in the emergency room,” Dr. Isabelle said.

That included using telemedicine equipment to consult with an Ochsner stroke specialist. Live, two-way transmissions allow Ochsner vascular neurologists to see and hear the patient, information that is critical to determining the size and location of a brain lesion and the best way to treat it.

“It allows me to treat the patient wherever they are,” said Gabriel Vidal MD, a vascular neurologist with Ochsner’s TeleStroke program. “With telestroke, the specialized physicians can share their expertise remotely, allowing for the patient to be treated without delay, and, in most cases, prior to or without the need to be transferred.”

TeleStroke consultations can allow patients to remain at STPH for treatment. In this more complex case, however, the patient was airlifted to Ochsner Medical Center in New Orleans, where she was treated successfully for stroke.

Brain scans and other information the STPH team sent to Ochsner allowed for faster treatment after the transfer.

“This experience gave us insight into developing a protocol that has shaved minutes off the (treatment) process,” Sharp said.

The partnership will only enhance a stroke protocol for non-emergency patients that STPH was already developing at the time of last year’s unique TeleStroke consultation.

Abry Crosby, Food Services manager and Chef at St. Tammany Parish Hospital, is always looking for ways to make eating healthier. Here’s the latest recipe to enjoy during breakfast!

**Shrimp, Squash & Cheese Strata**

**Ingredients**

- 1 ½ tablespoon vegetable oil
- 1 cup yellow onion, diced
- 1 cup squash and zucchini, diced
- 2 tablespoon fresh garlic
- ½ cup red bell pepper
- 1 tablespoon parsley, dry
- ½ teaspoon thyme, dry
- 1 tablespoon no-salt Cajun seasoning
- 1 ½ cup shrimp, raw and peeled
- 1 cup cholesterol-free eggs
- 1 ⅔ cup skim milk
- ⅔ cup reduced fat mozzarella cheese, shredded
- ½ cup low fat, low sodium cheddar cheese, shredded
- 2 low sodium dinner rolls or 3 pieces sliced low sodium bread, cut into small pieces

**Method**

Preheat oven to 350° and spray a 13x9 baking dish.

In a skillet, sauté onion in oil until lightly brown. Add squash and garlic, and cook until squash begins to soften. Remove from heat and stir in bell pepper, herbs, seasoning and shrimp.

Beat both types of eggs together in a bowl. Beat milk into eggs. Stir in shrimp and squash mixture. Stir cheese and bread into squash mixture. Then pour into sprayed pan.

Bake uncovered at 350° for 30 minutes. Turn and finish for 15 more minutes. Cook to 165°. Serve.

*You may freeze the strata before baking.*

Ingredients provided by the Wellness Department, based on recipes created by Chef Abry Crosby.
Jennifer Arceneaux didn’t have a reason to worry about her son’s heart. Taylor, 12, played for the Walker Renegades football team in Walker and liked to ride dirt bikes on the weekends, never showing trouble during sports physicals. But Arceneaux knew the story of Burke Cobb, the 14-year-old from nearby Dutchtown who collapsed and died in 2012 after football practice. Only after his death did his family learn he had hypertrophic cardiomyopathy (HMC), a thickening of the heart muscle that is the leading cause of sudden cardiac death among young athletes.

That’s why in April 2014 Arceneaux took Taylor to St. Tammany Parish Hospital, the only hospital in Louisiana to offer low-cost heart screenings for young athletes as part of the Living4Burke program in honor of Burke.

“This supports our growing focus on the pediatric population,” said Melonie Lagalante, director of STPH outpatient services. “We were glad to offer this to the community.”

The Living4Burke Foundation focuses on educating parents about the risk of sudden cardiac arrest in youth and encouraging them to have their children’s heart screened before participating in sports. Founded by Cobb’s family after his death, the not-for-profit foundation has screened about 1,700 athletes ages 12 to 22 at schools and community events throughout Louisiana, including about 300 children during a single day of a recent Mandeville soccer tournament.

Standard sports physicals do not include screenings such as EKGs, said Kristen Simpson, Living4Burke founder and Cobb’s aunt. About 4.5 percent of Living4Burke’s mobile screenings to date have turned up an abnormality of the heart, although many involve conditions that do not require surgery or other medical intervention.

“As a parent, you want to know that your child’s heart is healthy, but really the only way you can know that for sure is to have their heart screened,” Simpson said.

That message resonated with Arceneaux. But the screening performed at STPH provided her with more than peace of mind. Days after Taylor’s tests, she learned he had a quarter-sized hole in his heart. Left untreated, this abnormal opening in the wall between the two upper chambers of the heart could have led to serious heart problems, including an enlarged heart, she said.

Left untreated, this abnormal opening in the wall between the two upper chambers of the heart could have led to serious heart problems, including an enlarged heart, she said.

Days after Taylor’s tests, she learned he had a quarter-sized hole in his heart. Left untreated, this abnormal opening in the wall between the two upper chambers of the heart could have led to serious heart problems, including an enlarged heart, she said.

Physician Victor Sam Lucas MD, who is responsible for interpreting the results of the heart screenings, said he is pleased to see that awareness of the importance of heart screening continues to grow even with the availability of these screenings.

“Parents need to learn about the risks of sudden cardiac arrest in youth, but they also need to know that there are ways to help prevent it,” Lucas said. "By getting a heart screening, you can catch a potential problem early and take steps to prevent a serious health problem.”

“I think it’s important that parents know when it’s time to get their child tested,” Lucas said. "And the Living4Burke program is a great way to do that.”
Final Phases of Expansion Underway

3 North Unit Opening Soon

Spring brings two noteworthy developments for St. Tammany Parish Hospital: The April opening of 21 new private patient rooms and valuable work on the final phases of the multi-year construction project.

The all-private patient rooms in the hospital’s 1 North medical/surgery unit incorporate elements of the St. Tammany Hospital Foundation’s Healing Arts Initiative, which promotes art as a component of the healing process.

The new unit uses color and light to offer a soothing diversion for patients. An amber-toned nightlight setting allows STPH clinicians to examine patients during the night without disturbing them with harsh lights.

Targeted for completion in 2016, this largest and last phase of the Emergency Department expansion is comprised of three elements:

• A permanent walk-up entrance to replace the temporary entrance
• New waiting areas for pediatric and general emergency patients
• New areas to handle pediatric emergencies

“This is one large phase, and we will work on all three elements simultaneously,” said Randy Willett, project manager.

Through it all, the Emergency Department’s focus has remained on providing quality patient care, and patient satisfaction reports reflect that. Those scores have remained in the 90th percentile nationwide throughout the construction period at the hospital and along Tyler Street, Milton said, and the number of emergency patients has grown during that time.

“Keeping our focus on the quality of care has allowed us to see rising (patient) satisfaction scores, even as we’re expanding the Emergency Department,” she said.

Focused on Excellence

STPH Expands Specialty Care Network by Adding Northlake Surgical Associates

As part of its mission to provide world-class healthcare close to home, St. Tammany Parish Hospital has welcomed Northlake Surgical Associates to its network of specialty care to expand its surgical services available to patients.

The addition of the well-established Covington surgical clinic gives patients access to experienced, board-certified Northshore surgeons with expertise in a range of surgical procedures, including laparoscopic treatments.

Northlake Surgical’s focus includes gallbladder resection, hernia repair, acid reflux therapy and surgeries of the breast, colon, small intestine and stomach.

Bariatric or weight-loss surgery to improve the health of severely overweight or obese patients is another area of specialization for the practice comprised of Michael Carpenter MD, Irene Caillouet MD, Mark Dominguez MD, Ludwig Heintz MD, Mark Jones MD and John Verhulst MD.

The team of surgeons uses minimally invasive techniques whenever possible to provide maximum comfort and speed of recovery for patients.

“Our team provides a wide range of surgical procedures,” Caillouet said. “We have a breadth of expertise, and the fact that we’re now part of the hospital network means we bring that expertise to every element of patient care.”

Temporary Relocation

Northlake Surgical Associates at St. Tammany Parish Hospital has temporarily relocated its practice to the Frederick Medical Office Complex, 1203 S. Tyler St., Suite 210, to renovate and improve its permanent home at 606 W. 11th St.

Their phone number remains the same at 985-892-3766.

The addition of Northlake Surgical Associates to the STPH specialty care network means more opportunity for physicians, nurses and other caregivers to work more closely to better serve patients, said STPH Chief Nursing Officer Kerry Milton BSN RN MSHA.

“This puts everybody on the same team by directly engaging each member of the medical team in our matrix of best practices to improve patient care,” Milton said. “When you are on the same medical team, it naturally means more opportunity for communication and collaboration.

That collaboration includes having Northlake Surgical Associates transition to 100 percent of patient medical records being electronic.

“For everyone to have access to the same data all along the spectrum of care solidifies the quality of the comprehensive surgical care we offer,” said Dionne Williams, director of the St. Tammany Physicians Network.

“It improves patient care.”

Standing Behind Their Work

Giving to the Hospital Foundation is Personal for Employees

Providing world-class healthcare close to home is more than just a motto for St. Tammany Parish Hospital employees, many of whom have deep roots and connections on the Northshore.

That’s why many decide to support the health system they work for by donating to the St. Tammany Hospital Foundation’s annual employee campaign, which is on track to hit the $1 million mark when the 2015 campaign kicks off in July.

Susan Bond, an accounting clerk in the hospital’s Finance department, first decided to give upon hearing a presentation and personal story from a co-worker who was serving as an employee campaign chairman.

“He was battling breast cancer and one of the goals for that year’s campaign was to raise money for a breast imaging machine for the breast center,” Bond said. “His story really reached me, and I realized I wanted to help my fellow employees and others in the process.”

Bond has given since that initial donation in 2003, using her gifts to support an array of funds including the foundation’s Healing Arts initiative, the Women’s Pavilion, the employee walking trail and, most recently, pediatric care.

“I know this community well and I know many of the people who have and will benefit from my contributions to the foundation’s programs. Giving back to help others is just the right thing to do.”

- Annie Moses, Cafeteria coordinator

Getting firefighters safely back to work after an injury or illness is critical to the well-being of the communities they protect.

That’s why St. Tammany Parish Hospital Wellness Works, with the help of local fire districts, created a workplace wellness program exclusive on the Northshore to determine who are firefighters are ready to return to work after an extended illness or injury.

The Fit For Duty program offers evaluations that simulate the real-world challenges firefighters face on the job.

In the past, local firefighters had to drive to Harahan for such tests. “This is an investment in the health and wellness of the community’s firefighters,” said Michelle Fell, manager of STPH’s Outpatient Rehabilitation unit.

The program includes two main components.

The first is a medical evaluation of the sidelined firefighter by St. Tammany Physicians Network physicians with special training in firefighting health and wellness requirements.

The second element uses simulated rescue and fire-response operations to test firefighters’ ability to safely complete 13 different job functions.

STPH rehabilitation therapists play a central role in the second part of Fit For Duty. After an initial assessment of strength and flexibility, therapists walk alongside firefighters as they complete the indoor and outdoor work-simulation course.

The process includes checking each firefighter’s heart rate after tests that include:

- Walking 300 feet at their own pace and up and down two flights of stairs (14 steps per flight) in full firefighter personal protective equipment (PPE).
- Carrying a 26-pound fire extinguisher and 42 pounds of equipment up and down four flights of stairs, in full PPE at their own pace.
- Simulating ceiling and door breaches with specific weight requirements.
- Dragging a 175-pound dummy 100 feet while wearing 75 pounds of firefighting gear and an air mask.

“Tests the gamut of what we do both physically and medically,” said Ken Salzer, chief of EMS Fire District 4 in Mandeville.

The program is designed to measure a firefighter’s job-readiness regardless of the nature of an injury or illness, Chief of Administration Clint Ory of Fire District 13 in Covington.

“It’s 100 percent reflective of what we do,” Ory said.

Ory and Salzer worked with STPH rehabilitation therapists for more than a year to incorporate national standards into the program that also reflects local needs. To test STPH therapists’ readiness for their central role in the new evaluations, Ory asked them to lead veteran fire officials from throughout the region through the course.

“They know exactly what they are doing,” Ory said of the therapists. “It’s an excellent test of wellness and return-to-work readiness.”

Salzer agreed that Fit For Duty is an important asset for Northshore firefighters.

“We always told them (STPH) that if they built it, we would come,” Salzer said. “Well, they built it, and we did.”
DELIVERING ON THE PROMISE OF WORLD-CLASS HEALTHCARE CLOSE TO HOME

As healthcare reform changes medicine nationally and locally, St. Tammany Parish Hospital’s Governing Board and Administration work collaboratively to ensure the system’s growth delivers on the promise of world-class healthcare for west St. Tammany and surrounding areas. From strategic partnerships and continued expansion to governmental and public affairs, 2014 represented a year filled with opportunities, challenges, growth and achievement.

Quality was on the forefront of St. Tammany’s strategic goals in 2014 while St. Tammany Parish Hospital expanded access to specialty healthcare. Its three-year, $21 million expansion continued on track to add a new 21-bed unit of private rooms and an expanded emergency department in 2016. Our hospital was nationally recognized for its quality and safety accomplishments and local understanding of its business practices for the benefit of the patients we serve.

Partnerships
Hand in hand with our community physicians, Mary Bird Perkins Cancer Center and Ochsner Health System, St. Tammany Parish Hospital secured patient access to specialty care closer to home than ever before. 2014 represented a huge leap in St. Tammany Parish Hospital’s partnership with community physicians to ensure quality and safety for patients. The St. Tammany Quality Network, with leaders Dr. Mike Hill, medical director; and Jack Khashou, executive director, reached its goal: a 200-member clinically integrated network. Physician members benefit from electronic communication with each other and hospital transcription, emergency, radiology and laboratory plus outside pharmacy and laboratory procedures. 2014 also saw the launch of STPN’s Clinical Disease Registry to manage high-risk patients and report on key quality indicators.

The cooperative endeavor of St. Tammany Parish Hospital, Mary Bird Perkins Cancer Center and Northshore Oncology Associates achieved exciting milestones in 2014. The center was nationally recognized for exceptional patient experience, 100 percent of the center’s nurses and social workers earned specialty certification in cancer care, and we added procedures and multidisciplinary teams for lung cancer. Perhaps most important, the center drastically increased the number of clinical trials and patients in the trials to thanks to a NCORP grant. The center hosted 44 screening events, which meant 988 underserved residents of our area were screened. From those screenings, 234 were navigated because of abnormal findings and 12 were diagnosed with cancer. An additional 1,246 people were reached at 15 educational events where cancer information was shared. In addition, there were 20 professional education events with more than 320 physician/healthcare attendees.

Together, we can serve as the most comprehensive, integrated health system in west St. Tammany Parish.

Expansion
As the population of west St. Tammany grows, so does the need for healthcare services. The board and administration continued its commitment to expand services and infrastructure in 2014.

The three-year, $21 million expansion of inpatient and emergency services started in 2013 made significant progress in 2014. Scheduled for completion in 2016, the project is a series of phases that enable the parish’s largest acute care medical center to renovate and expand without sacrificing any emergency response, patient experience or inpatient capacity.

The addition of specialty practices in the service district including the expansion of patient services and resources in the region.

Business Leadership
In 2014’s volatile healthcare financial environment, the hospital maintained A and A- bond ratings from Fitch and Standard & Poor’s. As part of its commitment to reinvest gains in its caring mission, STPH provided a combined $37 million in uncompensated and compassionate care, delivering on the promise to care for our community no matter the circumstance. Compassionate healthcare programs include:

- Inpatient and emergency care for all
- Community education on health, cardiac rehab, pulmonary rehab, diabetes and parenting skills
- Cancer resources, screenings and support
- At-home visits for new moms
- Free immunizations, medical attention and registration for government assistance
- Hospice care

St. Tammany Parish Hospital continued its longstanding commitment to the community by providing $140,000 in fundraising and sponsorship for fellow not-for-profits whose missions closely align with the hospital. Our hospital foundation, plus local schools, health, wellness and community organizations measurably impact our mission.

Prudent leadership steered St. Tammany Parish Hospital to achieve admirable quality, safety and patient experience recognition in 2014, including U.S. News and World Report’s Best Hospitals, American Heart Association/American Stroke Association Get with the Guidelines Stroke Gold Plus Quality Achievement Award, Louisiana Department of Health and Hospitals’ WellSpot and Women’s Choice Awards for America’s Best Hospitals in cancer, heart, obstetrics, orthopedics and overall care.

Conclusion
In the end, 2014 was yet another step forward in St. Tammany Parish Hospital’s long-term strategic growth plan. The year ended with solid evidence that this community hospital delivered high-quality care from exceptional, caring healthcare providers in safe and modern environments close to home.
St. Tammany Parish Hospital has remained at the forefront of healthcare on the Northshore for more than 60 years. Literally, generations of families have sought their medical services through STPH. For the third straight year, St. Tammany Hospital Foundation received more than $1.1 million from the Northshore community to make a meaningful impact on the care and services provided by the hospital.

More than 1,600 donors contributed to a prosperous year in 2014. Individuals, including community members, hospital employees and volunteers who gave of their time, talent and treasure, contributed 50 percent of total giving to the foundation. The remaining 50 percent came from local companies, foundations and organizations.

Four signature special events, including Heart and Night of Fashion benefiting the advancement of pediatrics; Monster Mash aiding the Parenting Center; the Girl Lucky/Golf Tournament furthering the foundation; and Angels of Light supporting St. Tammany Hospital Hospice were all successful in 2014. The STHF Healing Arts Initiative committee’s Super Bowls Auction and the STPH Culture Committee’s Elf Auction rounded out the year’s events.

Community partners joined forces with the foundation for the St. Tammany Home Builders Association “Raising the Roof for Charity” Raffle House, the St. Tammany Women’s Council of Realtors’ Bras for a Cause, Playmakers’ “The Trip to Beautiful,” Zephyr’s Fan Appreciation Night, #GivingTuesday and the Crescent City Classic.

Annual support was an integral part of fundraising this year, including the traditional year-end letter, penned by chairman of the Board of Trustees Laurie McCants, and the always outstanding STPH Employee Campaign.

The partnership of Mary Bird Perkins Cancer Center at St. Tammany Parish Hospital continued to be a conduit of funds to benefit comprehensive cancer care. The Benefits of Home Gala, as well as October’s Go Pink events, led that effort.

Other donations came in the form of planned gifts that require more planning, negotiation and counsel than many other gifts. Charitable gift annuities are in that category and benefit the foundation while providing those donors a generous income for life.

To date, the community has given more than $12 million to the foundation. These gifts offer health and hope to others. Thank you for your unwavering generosity!

About the Foundation

Founded in 2003, the foundation is a 501(c)(3) nonprofit governed by a volunteer board of community leaders committed to the development of relationships and financial resources to support the healthcare programs, projects and services of STPH which is a self-supporting not-for-profit community hospital that receives no tax funding. The full 100 percent of each gift is used to fund programs, equipment and facilities at STPH.
For New Parents

New Family Center Tours
1st and 3rd Saturdays | 10 a.m. to noon
STPH New Family Center | Free
Learn about our private birthing suites, rooming in, skin-to-skin program and more. 985-898-4436

Art of Breastfeeding
Monday, May 4 and 11; July 13 and 20 | 6:30-8:30 p.m.
STPH Conference Room | Free
Discuss benefits of breastfeeding as well as common concerns of the early breastfeeding period to create a positive and successful breastfeeding experience. 985-898-4083

Prepared Childbirth
Tuesdays May 12 and 19; July 14 and 21 | 7-9 p.m.
STPH Conference Room | Free
Learn the physical and emotional changes that occur, how your baby develops throughout pregnancy, the signs and stages of labor, what to expect during childbirth and the breathing and relaxation techniques used during labor. Anesthesia options will be discussed. 985-898-4083

Baby Care Basics
Saturday May 13 and 20; July 22 and 29 | 7-9 p.m.
STPH Conference Room | Free
Learn helpful hints and what to expect when caring for your new baby. 985-898-4083

Boot Camp for New Dads
Saturdays May 9; July 18 | 9 a.m. to noon
STPH Conference Room | $10
Taught by veteran dads who orient rookies on the realities of fatherhood, including caring for baby and mom. ksupan@stph.org or 985-898-4435

Baby Chat for Siblings
Saturdays May 16; July 18 | 10 a.m. to noon
STPH Conference Room | Free
Siblings of newborns understand the changes that occur when mom and dad bring home a new baby. 985-898-4435

For the Kids

Play and Learn
Tuesdays May 5, 12 and 19; June 9, 16 and 30 | 9:30-10:15 a.m.
STPH Parenting Center | $15/members, $24/nonmembers
Parents and their children, 16 months to 4 years, play and learn together through music and movement, arts and crafts, and storytime. ksupan@stph.org or 985-898-4435

Pony Rodeo
Saturday, May 16 | 9 a.m. to 1 p.m.
Covington Trailhead (N. New Hampshire Street)
Get on board for our second annual event as we gallop, jump and stomp to the story of “A Pony Rodeo.” Healthy snack provided. ksupan@stph.org or 985-898-4435

Cuddle Buddies
Thursdays May 7, 14 and 21; June 11, 18 and 25; July 9, 16 and 30 | 10:30-11 a.m.
STPH Parenting Center | $6/members, $12/nonmembers
Learning and support opportunity for parents and social time for babies with songs, stories and playtime. ksupan@stph.org or 985-898-4435

Grow With Us
Tuesdays May 12; June 30 | 10:30-11 a.m.
STPH Parenting Center | Free
St. Tammany Master Gardeners Association/LSU Ag Center leads fun and educational presentations on working in the garden. ksupan@stph.org or 985-898-4435

Co-Parenting Classes
Mondays May 11 and 18; June 22 and 29; July 20 and 27 | 6-8 p.m.
STPH Parenting Center | $30/members, $35/nonmembers
For divorcing parents to learn methods and communication skills that help keep children out of a divorce. Children’s version available to help them as parents go through divorce. ksupan@stph.org or 985-898-4435

Boot Camp for New Dads
Saturdays May 9; July 18 | 9 a.m. to noon
STPH Conference Room | $10/dad
Taught by veteran dads who orient rookies on the realities of fatherhood, including caring for baby and mom, and learning what comes with new fatherhood. ksupan@stph.org or 985-898-4435
